Boiler Brush

3'X2" (915x50mm)
Keep your stove working well and brush your chimney at least once a year. Flue brushes are

designed to brush the flue pipe between the stove and the register plate. They will not be suitable to brush the whole of your chimney. Please only attempt to brush your own flue or chimney if you know how to do it. If you get the brushes stuck half-way up or collapse the chimney breast you will have a lot of trouble on your hands!

Product code 7009

Stove Safety and accessories

BabyDan Hearth gate

Baby Dan configure system consists of flexible panel units that can be used in many ways. Configure / Flex XL is perfect for keeping your child away hearths or fireplaces, as a normal safety for wide openings or as room divider. The gate is easy to mount and you can extend your gate with further section and position all sections as you wish. The extra wide door section provides easy access, and has a double locking handle for extra safety, which can easily be opened with one hand by an adult. Thanks to the quick release fittings, the gate can

easily be dismantled from the wall fittings without the use of any tools.

Contains:
1 x door section (72cm);
2 x large sections (72cm);
2 x small sections (33cm);
and wall fitting.

Product code 9002

XL can be extended indefinitely with extra sections (33cm or 72cm) available separately.

Infra Red Thermometer

Ideal For Stove service or stove Installer.
Accurate flue or stove operating temperatures or checking surface temperatures

Product code 9005

Stove Top Fan

Stovetop fans are a highly ingenious yet simple way of spreading the heat from your stove. The fan is powered by heat which circulates warm air created by the stove into the room. No need for mains power or batteries.

A thermoelectric module acts as a small generator to power the motor of the fan. When a heat difference is experienced by the ecofan generator module between the surfaces at the top and bottom, it pumps out

electricity. It is made from extruded aluminium and will therefore not rust.

Have the stove operating within the temperature range of "best operation". For this reason we recommend you use a stove pipe thermometer (9006)
Height 223mm(9") - excludes handles.
Base dimensions:121mm x 76mm
Blade diameter: 200mm
Product Dimensions: (H) 223mm
